

Halogen lamps.

The brilliant light of halogen lamps has a much higher luminous intensity than that of ordinary light bulbs. Things simply look better in it.

They give surfaces a scintillating shine and provide an enchanting effect as the spectral colors shimmer in the reflectors. No wonder that halogen lamps are so popular among interior designers. Because the lamps are so compact and because there is such a wide variety, from narrow spotlights to wall washers, they offer enormous scope for creative lighting. They also last up to five times as long as conventional incandescent lamps.

Halogen lamps are moving into more and more applications. They are regularly in use for example at trade fairs and exhibitions, in shops, offices and hotels and of course throughout the home.

All the mains voltage halogen lamps shown are rated for the European line voltage of 230 V.
 Other voltages are available on request.
 For LED systems/LED lamps for general lighting see Chapter 8.

Halogen lamps – innovative light for a clear view of things.

Halogen lamps.

Bright natural looking light, long life and greatly reduced electricity costs are the strengths of our modern halogen lamps. You can use them to brighten up your entire home, business or restaurant, both inside and outside, with everything from small reading lights to large spotlights. We particularly recommend our innovative ENERGY SAVER halogen lamps. By saving on CO₂ emissions they help reduce the greenhouse effect.

Halogen lamps from OSRAM provide feel-good light that has a similar effect to natural light. All our halogen lamps are fully dimmable, so depending on your mood you can have them as bright as daylight or as cozy as you like.

OSRAM halogen lamps not only look good, they perform a wide range of functions. They provide light in furniture, display cabinets and small luminaires, and can transform entire rooms. Thanks to their internationally standardized bases, halogen lamps can now be used in almost any luminaire. Obviously we offer halogen lamps for applications that require direct ac power supplies and applications that require transformers. The HALOGEN ENERGY SAVER lamps from OSRAM with screw bases are particularly practical as they are simple direct replacements for ordinary light bulbs.

The bulb on a halogen lamp always remains clear so the output remains constant throughout the life of the lamp. This is thanks to the halogen in the filler gas which prevents the vaporized tungsten from being deposited on the bulb by combining with it and flowing back to the hot filament. The tungsten is then deposited back on the filament and the halogen released in the process returns to the cycle.

OSRAM ENERGY SAVER lamps offer energy savings of up to 30%. This is achieved through two different principles.

Reduction in losses through thermal radiation (IRC).

Special bulb geometry and a high-quality coating on the bulb that reflects the thermal radiation (infrared) ensure that the heat emitted by the filament is directed back to the filament. This means that the filament is heated further, and less electrical energy is therefore needed. This technology is used for all the ENERGY SAVER low-voltage lamps (12 V) because of the optimum geometrical conditions.

Reduction in heat losses via the filler gas (xenon).

The thermal conductivity of the filler gas decreases in proportion to the size of the gas atoms (mass and diameter). By selecting the right filler gas it is possible to reduce the heat lost from the tungsten filament via the gas. This also means that less electrical energy is needed to heat the filament. By using a filler gas with atoms that are as heavy as possible the vaporization of the tungsten atoms from the filament can also be slowed down. The life of the lamp is extended as a result. Of all the inert gases, xenon best meets these requirements. Despite the high costs involved we therefore use xenon as the filler gas for all high-voltage ENERGY SAVER lamps from OSRAM.

Other effects.

If we take into consideration the lower costs for air conditioning and also the lower costs for relamping thanks to the longer life of ENERGY SAVER lamps the cost savings compared to standard lamps such as the DECOSTAR® ES may be as high as 65% depending on the electricity price.

Benefits of ENERGY SAVER technology:

- Up to 65% cost savings
- Twice the average life for low-voltage halogen lamps and line-voltage halogen lamps with screw bases compared with equivalent standard lamps
- The luminous flux, luminous intensity and color perception remain constant throughout the life of the lamp
- Higher luminous efficacy
- Lower thermal output
- Lower power consumption

HALOPIN® ENERGY SAVER

HALOPIN® ENERGY SAVER lamps from OSRAM are direct replacements for standard 40 W HALOPIN® lamps. Not only do they provide light that is at least as brilliant, they save up to 20% energy and CO₂.

- Up to 20% energy savings
- Robust filament design thanks to innovative, unique bulb pinch technology
- Complies with IEC 60432-3 thanks to integrated fuse function, the lamp shuts down reliably
- Approved for use in open luminaires to IEC 60598-1
- No transformer required
- Simple handling thanks to G9 plug-in base/holder system
- Color temperature approx. 2900 K
- Average life of 2000 hours
- Dimmable
- Extremely compact dimensions

With HALOPIN®, OSRAM has developed an innovative solution for line voltage lamps and continued the trend towards miniaturization.

As a mini line voltage halogen lamp, HALOPIN® is ideal for modern luminaires in living rooms.

- Extremely compact dimensions
- Robust filament design thanks to innovative, unique bulb pinch technology
- Complies with IEC 60432-3 thanks to integrated fuse function
- Approved for use in open luminaires to IEC 60598-1
- No transformer required
- Simple handling thanks to G9 plug-in base/holder system
- Color temperature approx. 2900 K
- Average life of 2000 hours
- UV-FILTER
- Dimmable

DECOPIN®

DECOPIN® is the world's smallest and lightest line voltage halogen lamp. Ideal for refined luminaires throughout the home.

- Incredibly small dimensions for revolutionary new luminaire designs
- Elegant aluminum reflector with optimized faceting
- Weighs just 9 grams
- No transformer required
- Innovative bulb pinch technology for the burner
- Meets the safety requirements of IEC 60432-3: the lamp shuts down reliably
- Approved for use in open luminaires (IEC 60598-1)
- Average life of 2000 hours
- Simple handling thanks to standardized G9 base
- Color temperature approx. 2900 K
- UV filter
- Dimmable

OSRAM HALOPAR® 16 ENERGY SAVER

With its OSRAM HALOPAR® line voltage halogen lamps, OSRAM offers a real alternative to low-voltage reflector lamps. They do not require a transformer but still provide brilliant white halogen light. They are available in various wattages and with different beam angles, making them ideal for revitalizing rooms and providing accent lighting. OSRAM HALOPAR® 16 is ideal for modern small and stylish halogen luminaires and is the halogen line-voltage counterpart of the DECOSTAR®. It is available with an aluminum or dichroic reflector. The new OSRAM HALOPAR® 20 with a GU10 base, aluminum reflector and output of 75 W is a real powerhouse, making it ideal for accent lighting.

- Average life of 2000 hours
- With whole glass reflector for brilliant lighting effects
- Innovative bulb pinch technology for the burner and with integrated fuse function; complies with the safety requirements of IEC 60432-3
- Approved for use in open luminaires (to IEC 60598-1)
- No transformer required
- UV-FILTER
- Color temperature approx. 2900 K
- Dimmable

With its OSRAM HALOPAR® line voltage halogen lamps, OSRAM offers a brilliant and modern alternative to conventional reflector lamps. With their standard E14 and E27 screw bases they are quick and easy to install instead of ordinary light bulbs; they provide more light and last twice as long.

- More light than conventional reflector lamps
- Average life of 2000 hours
- With whole glass reflector for brilliant lighting effects
- Complies with the requirements of IEC 60432-3
- Approved for use in open luminaires (to IEC 60598-1)
- UV-FILTER
- Color temperature approx. 2900 K
- Dimmable

HALOGEN ENERGY SAVER: 30% energy savings and direct replacement for ordinary light bulbs.

HALOGEN ENERGY SAVER lamps are available in the classic shapes of bulb, candle and spot. Ordinary light bulbs can therefore be replaced, like for like, in no time at all. HALOGEN ENERGY SAVER lamps provide light that is as attractive as that from an ordinary light bulb. They also save up to 30% energy and last twice as long as an ordinary light bulb.

- Familiar bulb shape
- Up to 30% energy savings
- Average life: 2000 hours
- Bright white halogen light
- Simple operation on line voltage without a transformer
- Dimmable
- Color temperature approx. 2900 K

HALOGEN ENERGY SAVER Classic BW and P offer energy savings of up to 30% compared with ordinary light bulbs and provide a pleasant attractive light. They are the perfect alternatives to ordinary light bulbs as they provide the following benefits:

- Familiar bulb shape
- Up to 30% energy savings
- Average life: 2000 hours
- Attractive white halogen light
- Simple operation on line voltage without a transformer
- Dimmable
- Color temperature approx. 2900 K

HALOGEN ENERGY SAVER: less energy. More light.

The clever alternative to ordinary light bulbs. With its new HALOGEN ENERGY SAVER lamps, OSRAM can offer a large range of attractive lamps with screw bases for replacement of less efficient light bulbs. And of course they bring with them the familiar impressive benefits of halogen lamps such as twice the life and pure bright halogen light.

- Familiar bulb shape
- Up to 30% energy savings
- Cost-effective halogen alternative for direct replacement of conventional spotlight lamps
- E14 (R50) and E27 (R63) screw bases
- Average life of 2000 hours
- Significantly lower CO₂ emissions
- Lower thermal output
- Color temperature approx. 2800 K
- Fully dimmable

ENERGY SAVER

HALOLUX CERAM® with a B15d base is so slim it is perfect for narrow compact luminaires. It is available in wattages from 25 W to 230 W and does not require a transformer, making it the ideal lamp for modern stylish luminaires.

- Innovative bulb pinch technology for the burner
- With integrated fuse function; meets the requirements of IEC 60432-2
- Approved for use in open luminaires to IEC 60598-1
- No transformer required
- UV-FILTER
- Color temperature approx. 2900 K
- Dimmable

Enclosed luminaires must be used with these halogen floodlight lamps for both indoor and outdoor applications. (In accordance with IEC 60598).
Fuse protection with the indicated values is recommended on the luminaire side (as per IEC 60357).

HALOLINE® ENERGY SAVER:

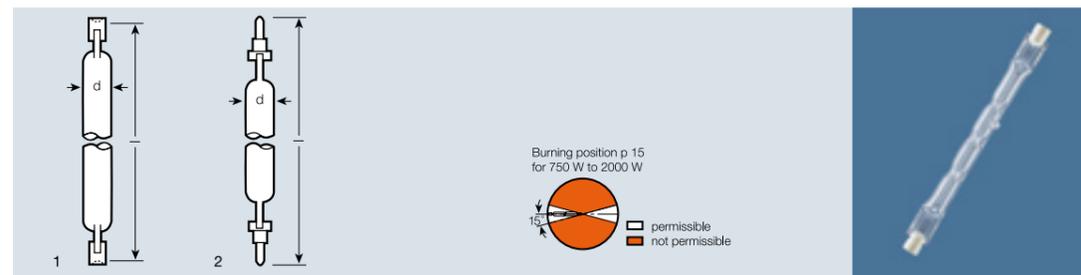

With its HALOLINE® ENERGY SAVER series OSRAM gives you a simple way of saving energy and protecting the environment at the same time. And you do not have to forego the excellent quality of light that brilliant halogen lamps provide. By replacing 500 W lamps with 400 W Energy Saver lamps you will save 100 W each time. That soon adds up. Just replace the lamps to start saving immediately and enjoy the pleasant atmosphere of halogen light. The range of applications for HALOLINE® ENERGY SAVER lamps is just as wide as it is for our HALOLINE Standard series. Whatever the application and whatever the burning position, HALOLINE® ENERGY SAVER lamps also help improve the efficiency with which valuable energy resources are used. This is made possible by using the highest quality materials and most advanced technologies to manufacture the lamps.

- Up to 20% energy savings
- Brilliant halogen light
- Ideal for emphasizing and accentuating the structure of a room
- 100% dimmable for a variable atmosphere
- Can be plugged in anywhere
- Color temperature approx. 3000 K
- Universal burning position
- Average life of 2000 hours
- Can be operated simply on line voltage without the need for a transformer

 Enclosed luminaires must be used with these halogen floodlight lamps for both indoor and outdoor applications. (In accordance with IEC 60598).
Fuse protection with the indicated values is recommended on the luminaire side (as per IEC 60357).

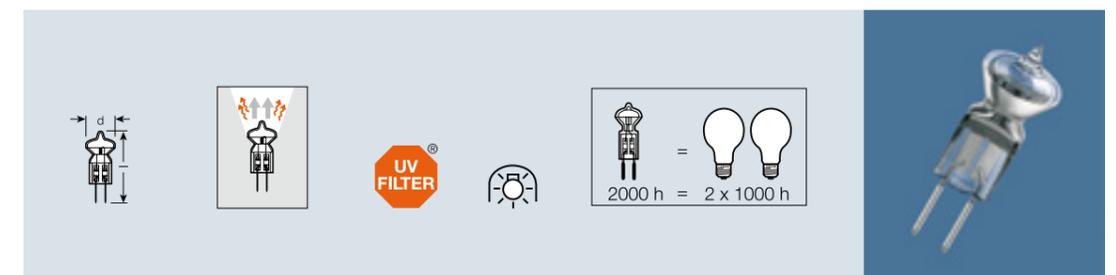

HALOLINE® can be used universally and is suitable for a wide range of applications. It is the classic lamp for small outdoor systems for floodlighting buildings and sports arenas and for security lighting. It is experiencing a renaissance in the home, where it is being used above all for indirect lighting to emphasize and accentuate the structure of rooms. HALOLINE® is also re-conquering classic applications, providing wide-area lighting from pendant luminaires in a wide range of new and exciting designs.

- Brilliant halogen light
- Ideal for emphasizing and accentuating the structure of a room
- 100% dimmable for a variable atmosphere
- Can be plugged in anywhere
- Color temperature approx. 3000 K
- Universal burning position up to and including 500 W
- Average life of 2000 hours
- Can be operated simply on line voltage without the need for a transformer

MINISTAR® follows the trend towards miniaturization in luminaires and opens up new horizons for impressive revolutionary luminaire designs.

The versions with the **axial reflector** can perform all the functions of modern spotlighting in a form that is more compact than ever before; available with GY6.35 and G4 bases. Recessed ceiling luminaires and flexible lighting systems are just two examples in which the benefits of these products really shine through.

- The smallest halogen axial reflector lamp in the world
- Extra long average life of 2000 hours
- Special coating for reduced thermal load in the luminaire
- Approved for use in open luminaires to IEC 60598-1
- UV-FILTER
- Dimmable
- Color temperature of 3000 K

MINISTAR® Side Reflector

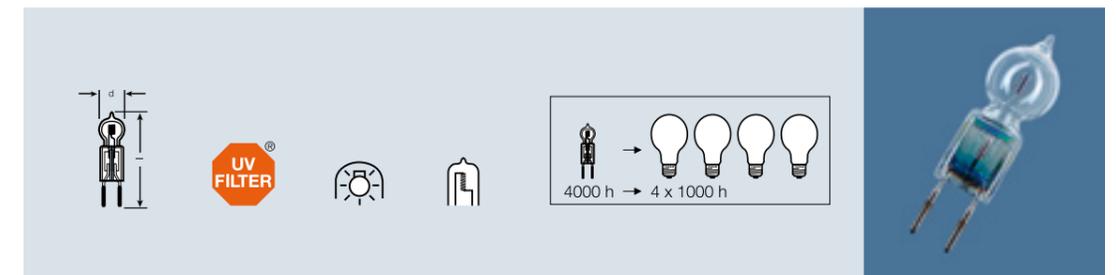

| Product reference | Product number | W | V | cd | t(h) | ° | | d max. [mm] | l max. [mm] | |

Straight to the point.

With HALOSTAR® lamps, it is possible for light sources in "starlight ceilings", furniture luminaires and chandeliers for example to be on open display without the need for protective shields.

Thanks to IRC technology the HALOSTAR® ES needs much less energy to produce the same amount of light.

- Up to 60% cost savings¹⁾
- Long average life of 4000 hours
- High luminous efficacy of up to 26 lm/W
- Significantly lower CO₂ emissions due to energy savings
- Approved for use in open luminaires to IEC 60598-1
- Dimmable
- Color temperature of 3000 K
- Low thermal output
- Axial filament for optimum directional light
- Special pins for corrosion protection
- UV-FILTER

Free-burning halogen lamps such as HALOSTAR® STANDARD, have given lighting designers new freedom thanks to their brilliant, highly focused and decorative light.

- Average life 2000 hours
- Approved for use in open luminaires to IEC 60598-1
- UV-FILTER
- Dimmable
- Color temperature of 3000 K

HALOSTAR® 24 V

UV-reducing quartz suppresses unwanted UV radiation. The UV-related bleaching effect as defined by IEC has therefore been reduced by up to 80% compared with conventional pin-base lamps. Complies with the strictest UV protection thresholds (IEC 60432).

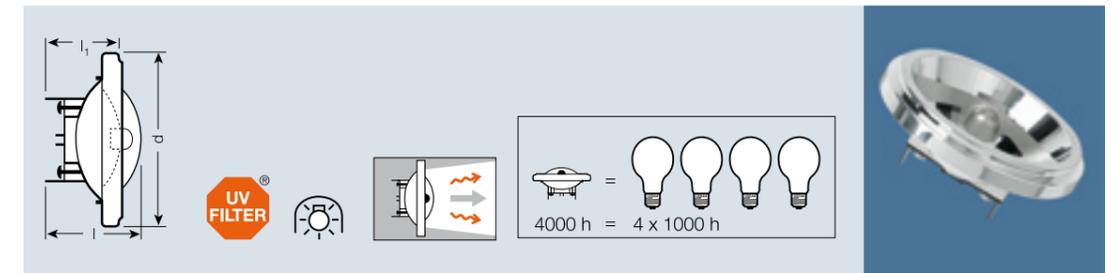

- The base pins are tempered to protect against corrosion
- The axial filament ensures optimum directional light
- High illuminance level

OSRAM HALOSTAR® oven

OSRAM HALOSTAR® for oven lighting has the following advantages over conventional oven lamps:

- Two to three times the luminous efficacy
- Optimum halogen content for high temperatures
- Tempered pins for reliable contact at high temperatures
- Suitable for pyrolysis (permissible ambient temperature 450 °C)

HALOGEN ENERGY SAVER lamps from OSRAM have been designed for commercial applications. They combine impressive economy and luminous intensity with excellent quality of light. In combination with the revolutionary HighTech reflector the result is outstanding brightness.

- Up to 48% cost savings with IRC technology²⁾
- Long average life of 4000 hours
- New HighTech reflector for
 - optimum illumination
 - less scattered light
- The powerful light for professional applications
- Approved for use in open luminaires to IEC 60598-1
- Cap for reduced glare and ease of handling
- UV-FILTER
- Dimmable
- Significantly lower CO₂ emissions due to energy savings
- Color temperature of 3000 K

Applications:

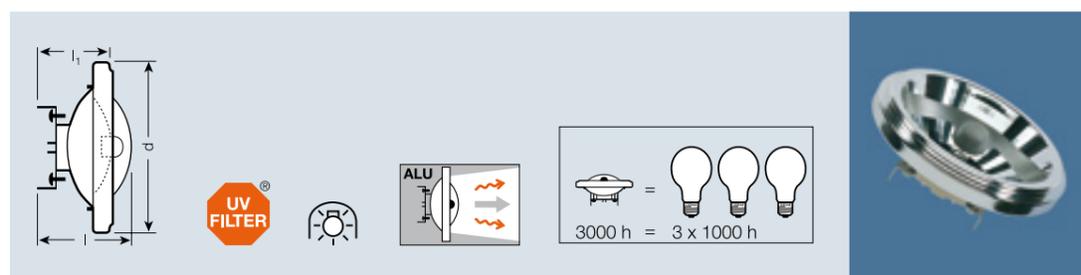

Shoplighting, restaurants, hotels, art galleries, high-ceiling rooms, etc.

HALOSPOT® 111 lamps have reflectors with excellent focusing properties and extremely tight beam angles of as little as 4° for enormous luminous intensity so that objects can be highlighted even in bright surroundings.

- Long average life of 3000 hours
- Powerful light
- Approved for use in open luminaires to IEC 60598-1
- UV-FILTER
- Cap for reduced glare and ease of handling
- Dimmable
- Color temperature of 3000 K

The faceted reflector ensures the light is evenly distributed. The lamps are equipped with cap for reduced glare and ease of handling.

- UV-reducing quartz is used for the integral lamp. The lamp therefore complies with the strictest UV threshold values (as per IEC 60432) and their UV-related bleaching effect is reduced by up to 80%.
- 12 V versions in low-pressure design. The lamps may be used in free-burning applications without a shield on the luminaire in accordance with IEC 60598
- The high-pressure 24 V version requires a shield
- HALOSPOT® 70, 48 lamps are dimmable
- UV-FILTER
- Color temperature of 3000 K

The energy and money-saving lamp: DECOSTAR® ES.

Energy Saver lamps combine economy, luminous intensity and quality. What's more, these new lamps last up to 5000 hours.

The Longlife coating of the reflector ensures constant luminous intensity and color location. Thanks to innovative technology and the IRC infrared coating on these lamps you save a large amount of electricity and up to 65% in costs compared with standard halogen lamps. And the environment benefits too.

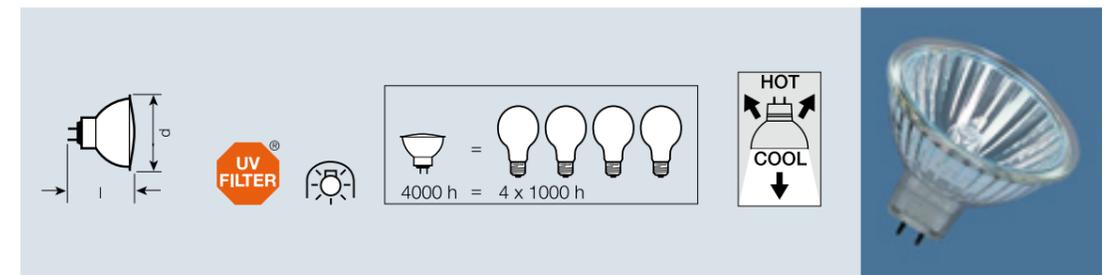

- Up to 65% cost savings through IRC technology¹⁾
- Extra long average life of 5000 hours
- Significantly lower CO₂ emissions due to energy savings
- Constant luminous intensity and color location throughout their life
- UV-FILTER
- Dimmable
- Color temperature of 3000 K
- Constant bluish appearance of the light escaping at the back of the reflector
- Dichroic reflector reduces the heat in the light beam by up to 66%
- Approved for use in open luminaires to IEC 60598-1

- Average life of 2000 hours
- Dichroic reflector reduces the heat in the light beam by up to 66%
- Approved for use in open luminaires to IEC 60598-1
- UV-FILTER
- Dimmable
- Color temperature of 3000 K

DECOSTAR® ALU

The aluminum-coated reflector without a shield reduces the thermal load in the luminaire by around 60% compared with aluminum-coated reflectors with a shield and by about 80% compared with dichroic reflectors with a shield. The dimmable lamp with UV-reducing quartz (as per IEC 60432) offers a neutral light throughout the life of the lamp.

- Long average life of 3000 hours
- Approved for use in open luminaires to IEC 60598-1
- UV-FILTER
- Dimmable
- Color temperature of 3000 K

DECOSTAR® COOL BLUE® is ideal for jewellers, art galleries and anyone who prefers cold light colors.

- Particularly cool light at 4500 K
- Long average life of 4000 hours
- Dichroic reflector reduces the heat in the light beam by up to 66%
- Approved for use in open luminaires to IEC 60598-1
- UV-FILTER
- Dimmable
